Skills

Communication, Teamwork, Time management, AWS, Distributed Systems, REST API, Linux, Database Management, System Architecture, Algorithms, Security System Experience, Logging, Project Management, Product Demos, Concurrency, Bash, Cloudformation, Docker, Fast API, Github Actions, Pytest, MagicMock, Moto, Boto3, PostgreSQL, Redis, CI/CD, Data build tool (dbt), Snowflake

Experience

Koch Capabilities, LLC | Wichita, KS

Lead Full Stack Software Engineer | 11/2025 - Present

- Promoted to Technical Product Lead (TPL) for the flagship technical data product in the Data Management, Enablement, & Transformation team (D|MET) establishing technical requirements and aligning priorities with stakeholders.
- Leading deployments, becoming a subject matter expert (SME), working closely with product owners, and delegating engineers to accomplish sprint priorities efficiently.
- Empowered the team with agentic coding technology, hosting knowledge transfers about claude code and open code as well as how to build skills, agents, hooks, plugins, and more.

Full Stack Software Engineer | 01/2024 - Present

- Created a secure data manipulation web application for the Koch tax organization using ECS, Fargate, Cloudformation, SQS, Eventbridge, Lambda, DynamoDB, API Gateway, S3 and many others, while following Agile principles and collaborating between engineers and end users.
- Integrated OAuth 2.0 as well single sign-on (SSO) and CI/CD on several of our applications serving hundreds of end-users, ensuring a smooth login process for users and a quick deployment cycle for developers.
- Bolstered security within existing applications and reducing exposure risk by leading a collaboration with our engineering team and security personnel.

Koch Ag. & Energy Solutions | Wichita, KS

Platform Engineer | 07/2023 - 01/2024

- Simplified preparing large groups of Windows servers for patching by using Python's Asyncio module's concurrency programming combined with PowerShell scripting on a Jenkins instance, saving resources and approximately 120 hours during the patching process.
- Administrated AWS accounts configuring IAM permissions, EC2 instances and Route 53 traffic, ensuring the development team has the resources needed to complete their projects.
- Established and configured a virtual private cloud (VPC), its subnets, security groups, and route tables in a new AWS account for secure use of a test environment AWS Relational Database (RDB).

Georgia-Pacific, LLC | Wichita, KS

Data Engineer Co-op | 01/2023 - 05/2023

- Automated data migration on several data pipelines by using services such as AWS Lambda, S3, Redshift, and Aurora DB as well as using the Pandas Python library.

Languages

Python - 4 years, SQL - 4 years, C/C++ - 2 years, Golang (Go) - New, TypeScript - New, Italian - A2, German - A1, English - Native

Certifications

June 2025: Snowflake's SnowPro Core Certification

Education

Wichita State University | Wichita, KS

Bachelor's of Science in Electrical Engineering | 06/2024

- Completed a Minor in Computer Science
